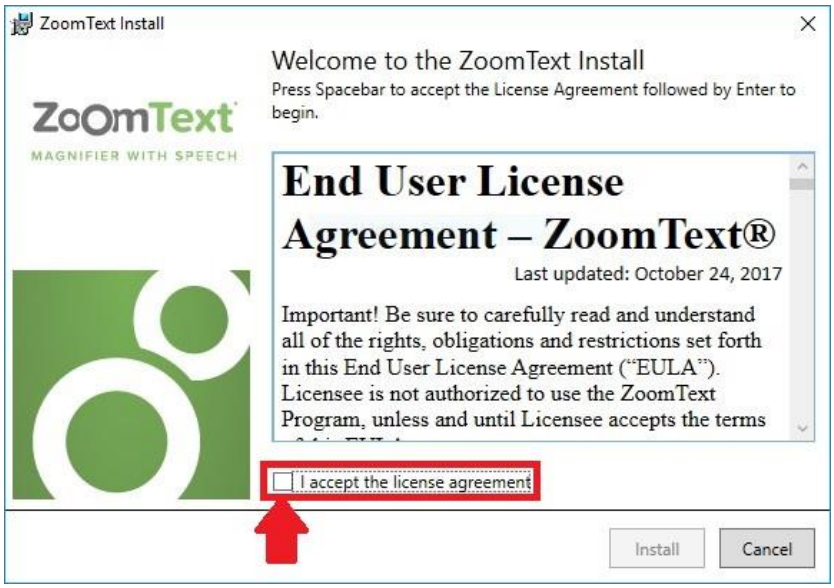
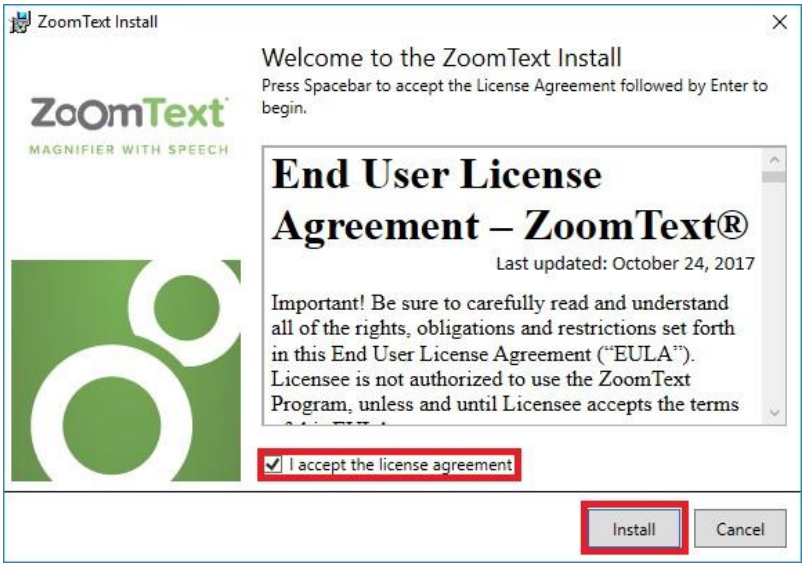
Initial Install

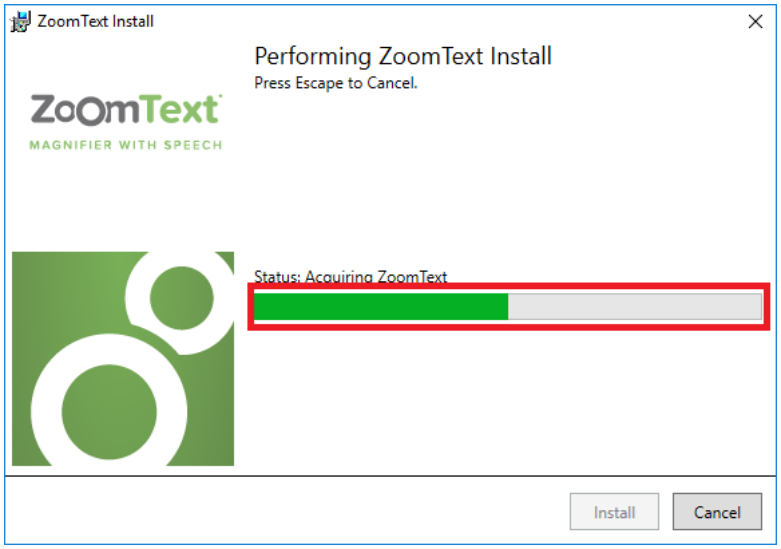
1. Run the JAWS .exe file after you've successfully downloaded it. Welcome to the JAWSInstall window will appear.



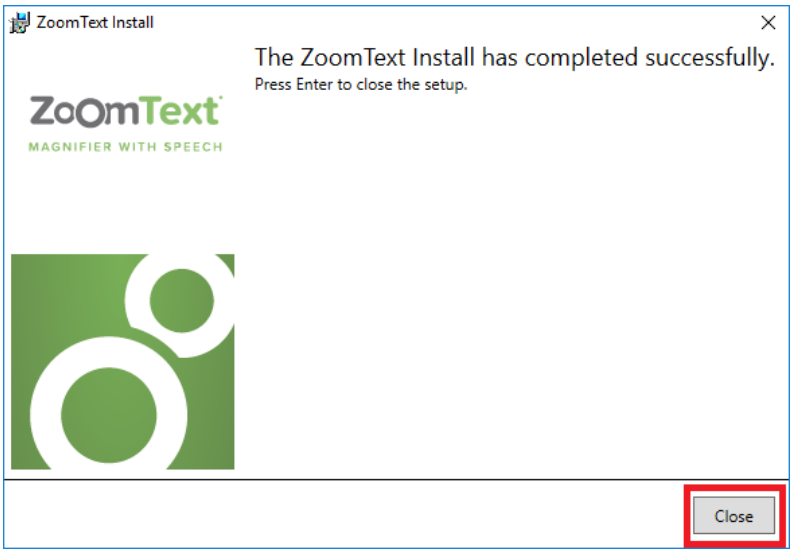
2. In this same window, select the "I accept the license agreement" checkbox followed by the "Install" button.



3. Green progress bar will appear under the Performing ZoomText Install.

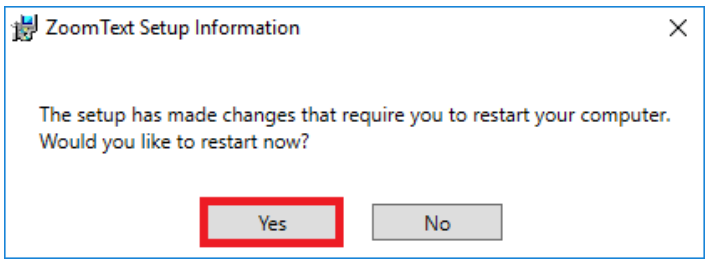


4. When the install process is successful, select Close.



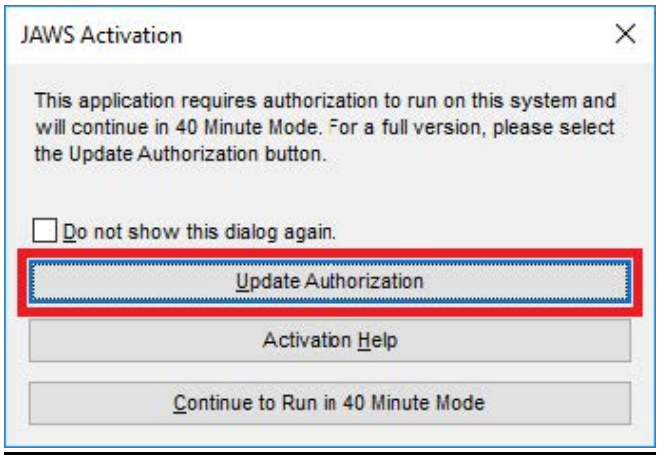
5. JAWS Setup Information will prompt you to restart your computer. Click "Yes" to begin.

Be sure to save all your work before doing this.

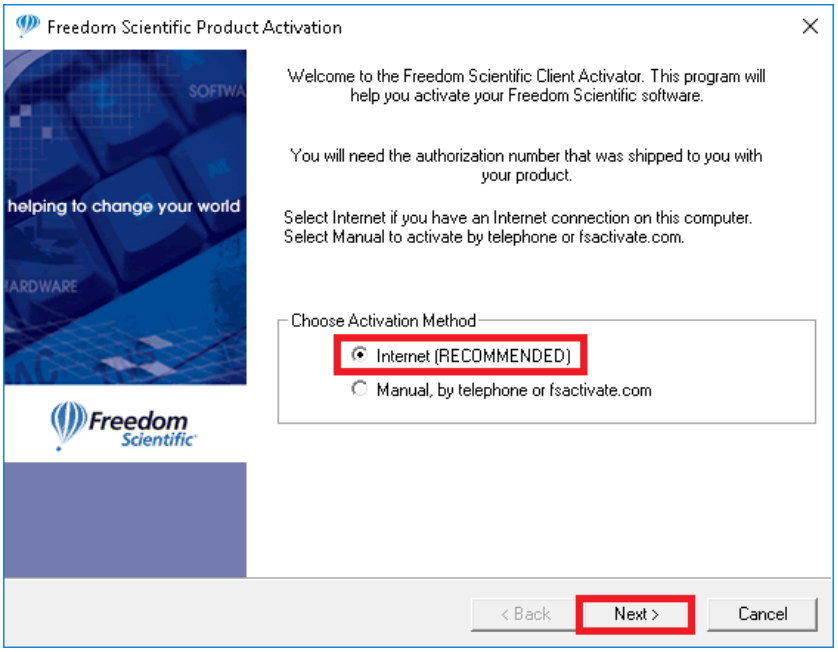


Activation Process

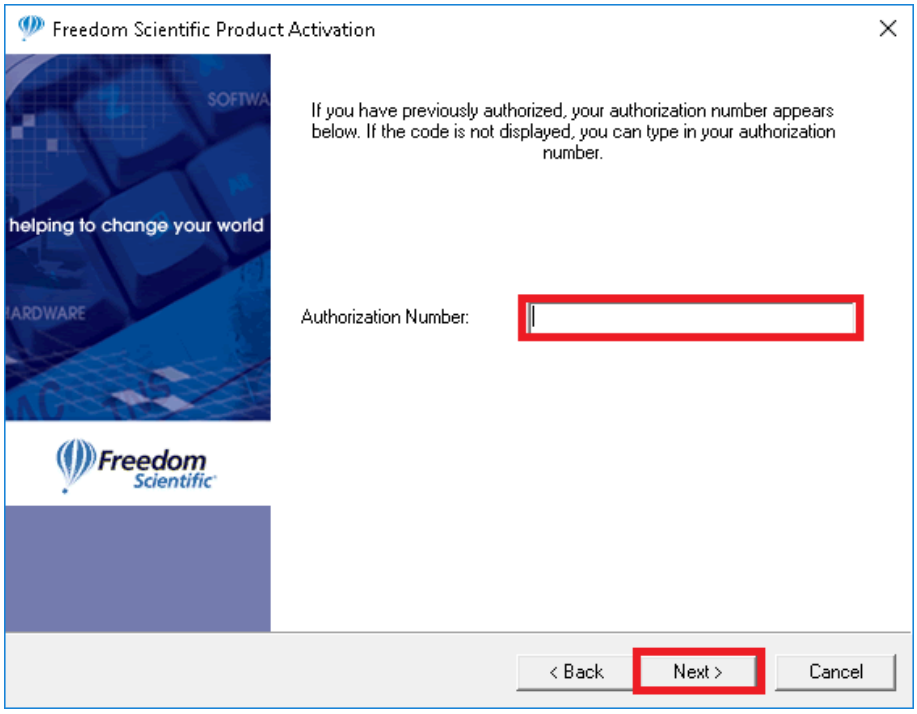
6. After restarting your computer and logging in, you will be prompted with the JAWS Activation window. Select Update Authorization.



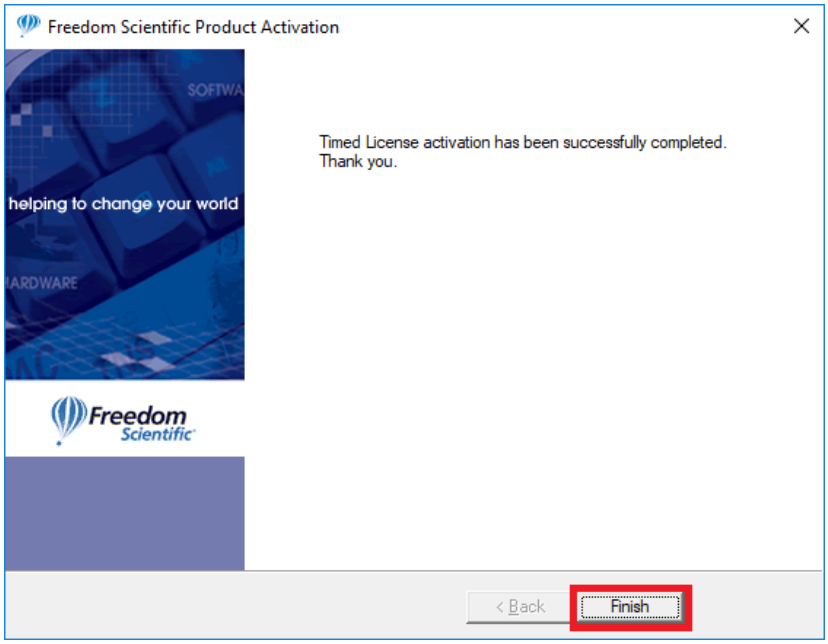
7. Freedom Scientific Client Activator window will appear prompting to select a Activation Method. Select Internet (RECOMMENDED).



8. Freedom Scientific Product Activation window will prompt you to insert the Authorization Number. Then select Next.



9. "Timed License activation has been successfully completed. Thank you." will appear after inputting the Authorization Number. Select Finish.

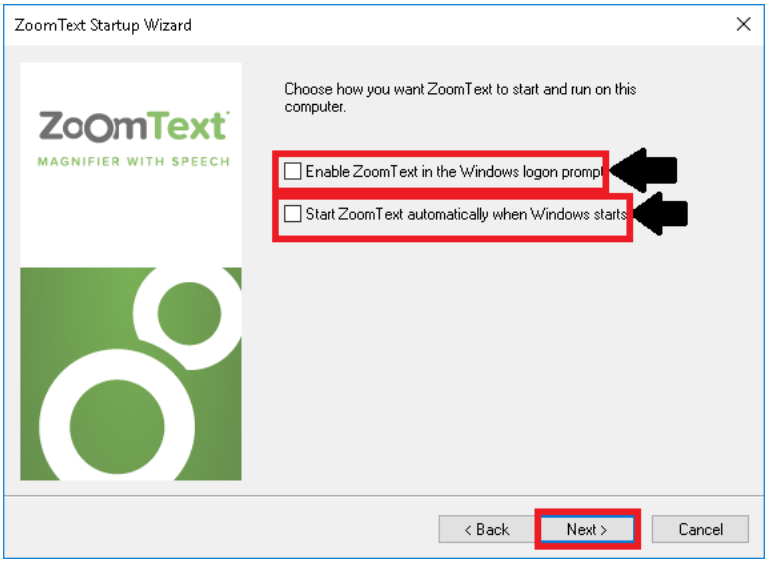


ZoomText Setup

After you have finished with the Activation process, you will then need to setup ZoomText to best suit your needs. Normally ZoomText will open up on its own, after installation. If this doesn't happen launch ZoomText from the Start Menu.

10. ZoomText Startup wizard will appear. In this window, you'll be able to configure Language, Synthesizer, and Voice. After you've made your changes or left options at default, click Next.

11. In this window,you will have the option to enable when and where ZoomText run once you start your computer. You can leave these unchecked if not needed and select Next.



12. Once you have clicked on next, you will have the option to Enable ZoomText Error Reporting. You may check this option if you like. After you have finished you may click Finish to close out the setup Wizard.
