ZoomText Fusion 11 Bundle Installation/Activation for home use.

This guide was done on Windows 10 and will work with previous versions of Windows. This installation guide is for off campus use and will install ZoomText Fusion, JAWS 18, and ZoomText 11. Please contact CATS for Activation information.

**Step 1:** Click next to begin the Fusion installer.

![Fusion installer screenshot with Next button highlighted]

**Step 2:** Click next to continue.

Step 4: Select “Custom” installation type, then click next to continue.

Step 5: Uncheck both “Run ZoomText after login” and “Enable Windows logon support”.
Step 6: Now it will continue to install the software as shown in the image below.

Step 7: You can continue to click next and continue without changing anything else, and lastly, check “Reboot now” and select Finish.
**Note:** Once the computer boots back up after rebooting you should see the Zoomtext Fusion icon "ZoomText Fusion 11" on your desktop. Click the icon to open the software in order to continue and move on to the following steps.

**Step 8:** Select “Internet (Recommended) then click next to continue.
**Step 9:** Select “Enter Authorization Number Manually”.

**Step 10:** Type in your authorization number.
Step 11: After entering the authorization number, a message should appear “Activation has been successfully completed” as shown in the image below. Click finish to complete the installation.
Continuing JAWS 18 Installation

After you install ZoomText Fusion, you now have to continue the installation process for JAWS 18.

1. Uncheck “Start JAWS at the Logon screen” and change the “Start JAWS after logon for the user:” to “Never”. Then, select Next.
2. After step one, continue to press next and do not change the rest of the options. Installation will be finished.
