# **Kurzweil Network Installation**

In this tutorial we'll go through the installation process and the essential configurations to run Kurzweil 3000 Network Edition.

## 1. Installing License Manager

The License Manager needs to be installed in a computer that is reachable from all the computers in a simple or remote network. Look for the Network disc (Master CD) included in you Kurzweil 3000 package and insert it in your CDROM. A window will pop up displaying three options:

- Install Engine and Administrator
- Install Client
- Install Remote Administrator

NetworkMasterSetup	
Install Engine and Administrator	
Install Client	
Install Remote Administrator	

Click on "Install Engine and Administrator."

• This will start the installation wizard which will start with a Welcome window and the License Agreement. Select "I accept the terms in the license agreement" and click **Next**.

### 2. Managing Licenses

After installing the License manager restart the machine. The installation wizard adds shortcuts to the start menu and the desktop for easy access. To open the License manager click on the icon located either on the start menu or the desktop. The following image illustrates the interface of the Kurzweil 3000 License Manager administrator.

N	Kurzweil 300	00 Network Administrato	r		
Ē	jile <u>U</u> sers <u>T</u> ools	<u>L</u> icenses <u>R</u> eports <u>H</u> elp			
	1 Current User	(s):			
	User	License		Name	Address
	<kurzweil 3000="" a<="" td=""><td>dministr <kurzweil 3000="" admi<="" td=""><td>nistrator&gt;</td><td>techroom</td><td>127.0.0.1</td></kurzweil></td></kurzweil>	dministr <kurzweil 3000="" admi<="" td=""><td>nistrator&gt;</td><td>techroom</td><td>127.0.0.1</td></kurzweil>	nistrator>	techroom	127.0.0.1
[[	Jnlocked]	Licenses: 0 Pro (Color) , 0 In	Jse 0 Pro (B&W) , 0 In Use	0 LearnStation , 0 I	n Use

**Note:** The license manager also allows you to monitor the usage of licenses as well as the features that are being used by the user. It creates reports of events produced by the user; these features are great help for a professor to get a feed back on the weakness of the student and focus more on how to improve the learning techniques.

To install the licenses plug in the USB key to one of the USB ports in your computer. Next, on the Kurzweil 3000 Network Administrator window click on **Licenses** in the menu bar and select **Manage licenses**.

A window will pop up which will contain a summary of how many keys are currently installed, how many are in use and how many were loaned. To install new licenses click on **Read Key** in the License Management window. Then click the **Install** button depending on the license type you want to install.

<u> License</u>	Мапа	gement					X
Professiona On Key:	al Color- <b>D</b>	Key Max:	0	Installed:	3	İnstall	Uninstall
- Professiona	al Black-	and-White					
On Key:	0	Key Max:	0	Installed:	18	<u>I</u> nstall	Uninstall
LearnStatio	n						
On Key:	0	Key Max:	0	Installed:	6	Install	<u>U</u> ninstall
						<u>R</u> ead Key	Done

Once installed the license you can unplug the USB key and place it in a safe place. With the USB Key you can install the licenses in different servers in different networks. To uninstall simply plug in the USB key then click on **Read Key** and then click on the **Uninstall** button.

# **3.** Client Install

S NetworkMasterSetup	After installing the license you can start deploying the clien installations. The client installatio is straight and simple. Click on the <b>Install Client</b> button.	
Install Client		

You will be prompted for the type of client install. Select the type according the license you ordered. Next, accept the License agreement and click next. Follow the installation prompts.

### Select complete install

#### **Start installation**

Once the installation is completed, a window will pop up asking for the IP address of the computer where you installed Kurzweil 3000 Network version. Once again, the computer hosting the Network version has to be reachable within a simple or remote network. If you are using a firewall you need to open port 1006 for Kurzweil 3000 client to be able to authenticate with the server.

Type in the IP address of the computer hosting the Kurzweil 3000 Network Engine.

Kurzweil 3000 NetworkBrowser Utility			
Enter the static IP address assigned to the Network Engine at the "Network Engine TCP/IP Address:" prompt, then click "OK".			
To run both Kurzweil 3000 and Kurzweil 3000 Network Engine on this machine, enter 127.0.0.1 at the "Network Engine TCP/IP Address" prompt and click " <u>O</u> K". The Kurzweil 3000 Network Engine must be installed and running on this machine. This option is not recommended if other machines will be connecting to the Kurzweil 3000 Network Engine.			
If you've previously specified a Network Engine address and you want to change it, type the new IP address at the "Network Engine TCP/IP Address:" prompt then click " <u>O</u> K".			
If you've previously specified a Network Engine address and you want to remove it, click "Clear".			
If you wish to exit without making any changes, click "Exit".			
You can run this utility again at any time to modify or remove your Kurzweil 3000 Network Engine setting.			
Network Engine Location			
Current Setting: 0			
Network Engine TCP/IP Address: 192 168 2 40			
<u>O</u> K E <u>x</u> it <u>C</u> lear			

Click on the Ok button and restart your machine. Now the client is ready to run.
