1. Un-install Both Kurzweil 1000 and 3000 from add/remove programs, does not matter on the order. Reboot if asked.

2. Un-install VoiceText Neospeech from add/remove programs, if present.

3. Run this special cleaner after the un-installs and select remove all:

4. Reboot your computer.

   Check to make sure that these folders are NOT present:

   C:\Program Files X86\Kurzweil Educational Systems

   %appdata%\Kesi

   Delete them if they are.

5. Install Kurzweil 1000- Be sure to Install Version 1000 first and then update it.

6. Install Kurzweil 3000 and update it.

7. Register K1000 first, then K3000.
